RE: Special Waste Disposal Authorization Number 16-1670

THIS AUTHORIZATION EXPIRES: June 10, 2017

Dear Robert Trump:

We have considered your request for disposal of three hundred (300) tons of petroleum contaminated soil from Sac & Fox Truck Stop, 1346 US 75 Highway, Powhattan, KS. (Analysis provided)

Based solely on the analysis provided, the waste is not a characteristic hazardous waste with respect to the constituents tested. As stated in K.A.R.28-31-261, it is the responsibility of the generator to determine whether or not a waste is a hazardous waste by either knowledge of process or by proper testing by a KDHE certified lab. If there are questions as to the status of this waste, please contact me at 785-296-0681. **If Total Petroleum Services LLC is confident the material for disposal is not a hazardous waste for any characteristic or listed constituent not included in the testing, the following applies.**

Approval is given to dispose of this waste at Rolling Meadows (Permit 0342), provided the following conditions are met:

1. Approval to deliver the waste must be obtained from the landfill operator prior to transporting the waste to the landfill. The final decision on whether to accept or reject the waste rests with the landfill operator. Please contact Special Waste Department at 800-963-4776, to obtain approval. If the landfill operator refuses to accept this waste, you should contact us to determine alternate disposal options.
2. The waste must be transported separately to the landfill and be identified to the operator upon delivery.
3. Kansas Administrative Regulation 28-29-108(r) (12) and (13) requires solid waste disposal facilities to maintain a log of commercial or industrial wastes received such as sludges, barreled wastes, and special wastes. The log must indicate the source and quantity of waste and the disposal location thereof. The special waste authorization number should be used as identification when entering the shipment into the log.
4. This approval is valid for disposal of the waste described and in the amount shown above. If additional shipments are required, you must contact us to receive another disposal authorization.

5. Operating standards as defined by K.A.R. 28-29-108(k) prohibit the disposal of liquid waste. "Liquid waste" means any waste material that is determined to contain "free liquids" as defined by method SW-846 9095B, Revision 2, paint filter liquids test, as described in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Pub. No. SW-846 dated November 2004. **For purposes of this disposal authorization, all waste for disposal must be able to pass the "paint filter test".**
6. Any change in the process producing this waste, any change in the materials used in producing this waste or any other change to this waste stream requires that a new Special Waste Disposal Authorization be obtained prior to disposal.

If you have any questions, feel free to contact me at 785-296-0681.

Sincerely,

Anthony (Tony) Guy
